---

Hi Sam,

I thought the cut off re the pause submissions was 1 May - and assumed it would be the end of the day, not 10am. Sorry for submitting late!..

My submission is that council should keep the hearing panel going while council is revisiting the plan. As shown in the hearings the community is telling council that they got it wrong in many ways initially with their proposals so how can we trust that council will get it right now? Also, many submitters have spent a lot of time and effort in their submissions so they should be recognised and valued. Council should also be given the key findings as they stand from the hearing panel to take into account in the work they are about to undertake. Again, if council just continue on with a similar approach to Plan 78 to what they have done thus far all you are doing is continuing with a direction that the community has said shouldn't, or won't, work.

Cheers  
Claire.
